Music Manager : User Opinions That's what people say about Music Manager possibilities:"On our radio station, as on any other, is stored a large amount of music records. Some of them are played regularly, some of them not. To find needed music record in our audio archive, where are stored thousands of music files, is very hard. We had to hire a special employee, who categorised records in archive, but even such salvation was not perfect - we periodically received several thousands of records in a day, and a person who organized them, could not sort and manage them all and made a lot of errors. All this unsorted music records collected, collected and collected... One day while real-time broadcasting music clips, prepared to transmission, were lost in all this chaos and we were forced to break transmission. My colleague from another radio station called me, when knew about incident, and advised to use Music Manager. Over several hours all our thousands of music's were sorted and organized and even if we are gathering several hundreds of new audio records every day, Music Manager easily append them to common music base - right from audio CD's! Thanks very much to all Music Manager developers. music file sorter, that they made, really helps people."

Gregory Thostenson, sound producer of radio-station "Voice of Colorado",

Gregory.Thostenson@ColoradoRadio.com

"At April issue of "My Computer" magazine I read that Music Manager – is the easiest and most user-friendly way to sort, rename and manage music files. I have large music file collection on my computer. Several first years it was easy to maintain it, but now, when I periodically download variety of music files from Internet it became very hard to find something in my music miles collection. I did not know what to do – variety of folders and in every of them are MP3 music files those I even never heard. I even wanted to stop collecting of music files, but suddenly come in mind that article – and I downloaded and started Music Manager. It was like a miracle – all my music files were sorted, renamed, organized automatically, exactly as I wanted. Really useful music file sorter – It is needed for everyone who has music files and wants them to be in ideal order."

Christopher Fienberg, music collector, ChFienberg@Music.com

Music Manager : Our mission

Why it is important to use Music Manager on your computer? Why it is important to manage MP3 music for it to be in ideal order? Today life is impossible to imagine without information, and information - without files. By reports, provided by independent researches, now more than 95% of music is stored in files and may be automatically organized by music management software, music manager program or MP3 music manager.

Several weeks ago was already started production of Hard disk with 800 000 Megabytes size, that is able to store already milliards of MP3 music files in variety of formats - and you, as potential owner of such hard drive with music files,

should manage music files on it for your MP3 music to be in order. How to manage music files when you are gathering variety of them every day, again and again? If not to manage music with music management software or an automatic music manager program than there is only one way - manage music manually. But it takes a lot of time.

When on a computer is stored such variety of files (including MP3 music files, those also should be organized using an music manager), especially if they are packed in numerous of archives, it is extremely hard to navigate between them without music manager, automatic music manager or other music management software. People often don't know, what files and where are stored, because their music and MP3 files are not organized with automatic music manager.

When in a folder several hundred, or even thousands of files with names like "audio61.mp3", "best(14).mp3c", "music_21.rar", "song46.avi" or even just "d24.zip" it will be needed days, or even weeks and months to understand without music manager, what is inside, manage all and move all in folders, according to content.

And even more - the whole music collections are deleted, because without music manager it is not possible to find out, what is inside and to find particular music record. You are in the danger! Is any salvation of such heavy situation? Yes, and it is - Music Manager. Music Manager : So, How to manage MP3 music easily? Music management software, music management program, automatic music manager - all we heard that it is very easy to manage music collection with music management software. How it works? You download music management program, music management software or MP3 music manager and it organizes all your music, removes duplicate music files, sort and automatically manage music files in your music collection.

So, how to manage music fast and easy? It is very simple. Just download Music Manager using the button below, run it and it will manage all your MP3 music - manage music files. And it is not all - Music Manager will not just manage MP3 music easily - it also will manage music files exactly as you want (more than 697 methods of how to manage MP3 music for you to select in one mouse click). Download Music Manager right now to manage MP3 music and get all your MP3 music collection to be in ideal order!
